ABOUT ME

I aim to become a leading **Software Developer** in the industry by deepening my expertise in software development processes.

WORK EXPERIENCE

Business Development Manager

AIESEC [06/2023 – 09/2023]

Managed data, oversaw processes, and communicated with customers. Excelling in B2B lead conversion, I maintained transparency by reporting to the Team Leader.

Skills: Corporate Communication · **Data Entry** · Data Management · Meeting Planning · **Marketing Strategy**

Back-End Observation Intern

Fintorly [10/2022 – 04/2023]

I joined to enhance the **C#, .NET, and Back-End skills** I gained in university. Thanks to this internship and supportive teammates, I actively participated in projects, deepened my expertise, and honed my overall software development abilities.

Skills: C# · .NET · **SQL** · **Git** · **Web Fundamentals**

PROJECTS

CV Analyzer - Desktop App

This project, which I developed with **C#** and **.NET**, allows users to select the file containing the **CVs** and **sorts the keywords they want** by **searching among thousands of CVs**. Thanks to this feature, you can spare more time for important tasks and increase your work efficiency.

Binance Trading Bot - Desktop App

My personal software, developed with powerful libraries such as **Python, Pandas** and **Numpy** for use on the Binance platform, has the ability to perform **backtesting** and **automatic buy-sell transactions 24/7**. As a professional software developer, I designed this software to create effective and efficient combinations in financial markets.

Social Media Database Template - Database

Open source and free, this **customizable database** offers **developers a quick start**.

It gives developers the chance to quickly organize and customize social media data.

Analyze your social media data, create reports and improve your strategies using the database.

EDUCATION AND TRAINING

Computer Programming

Istanbul Nisantasi University [2022 – 2024]

Nurse Assistant

Gaziosmanpasa Health Vocational High School [2015 – 2019]

CERTIFICATIONS

Programming Fundamentals - Duke University

"Duke University - Programming Fundamentals" course provided me with the opportunity to fill in the gaps in my foundation, allowing me to improve myself in **algorithmic design**, **problem generalization**, **algorithmic thinking**, and the **fundamentals of the C language**.

Link: <https://coursera.org/share/5475b650f08e815bc9e2862d2f0fc1b6>

Structured Query Language - Hacker Rank

My "Structured Query Language - Hacker Rank" certificate documents my proficiency in **database management** and **SQL queries**.

This certificate encompasses a series of SQL-based tasks that I successfully completed on the HackerRank platform.

Link: <https://www.hackerrank.com/certificates/9fc20ff92432>

Digital Marketing - Google

Google - Digital Marketing' is obtained to document my competence in acquiring fundamental knowledge and skills in the field of **digital marketing**.

SKILLS

Programming

C++, Python, CSS, JavaScript

.NET, Bootstrap, MS SQL, PostgreSQL

Software

Git, Linux, Arduino, Raspberry Pi

MS Word, MS Excel, Canva, Figma

HONOURS AND AWARDS

Certificate of Excellence

Yeniyuzyl University Private Gaziosmanpasa Hospital [2019]

I worked as a Nursing Assistant at Yeniyuzyl University Private Gaziosmanpasa Hospital during my mandatory internship in 2018-2019. I excelled in the Ophthalmology Unit, earning a certificate of achievement for my compassionate care. I later transitioned to the Emergency Department, continuing my humanitarian work.

HOBBIES AND INTERESTS

Arduino, Raspberry Pi, Communities Events, Coding, Philosophy

Developing Arduino, Raspberry Pi with my maker sister on weekends. **Coding the solutions** I imagine to the problems I encounter in daily life. Participating in events organized by **software communities**.

PUBLICATIONS

Lafuguzaf

[2021]

An old **poetry book** I published with KDY Publishing House.
